Copenhagen, Denmark

SKILLS

FRONTEND

Node.js · Vue.js · Angular

BACKEND

Java / Spring Boot · MVC & Repository-Service-Controller patterns · CRUD · REST APIs

DATABASES

SQL · NoSQL

PLANNING & MODELING

Merise · UML / class diagrams

DEVOPS & CLOUD

Docker · Ansible · Terraform · CI/CD (GitHub Actions) · Cloud hosting (OVH, IONOS, GCP, AWS, Clever Cloud)

SOFT SKILL

Client-oriented, always mindful of usability and delivery quality

LANGUAGES

- French (native)
- English (fluent)
- Spanish (intermediate)
- Russian (basic)

PROFILE

Graduating in December 2026, I'm looking for my first position as a software developer or as a network infrastructure engineer. I'm passionate about computer science, and you can find all my projects on my **portfolio**. I'm creative, attentive, and above all very motivated.

EDUCATION

Engineering Degree in Computer Science
2020 — 2026 (expected)

CY Tech

Specialization in cloud computing: DevOps, infrastructure, networks, fullstack development and software engineering.

PROFESSIONAL EXPERIENCE

Fullstack Developer Intern
2023

Locsport

Built a showcase website with HTML, CSS and JavaScript. Hosted it on IONOS independently, working directly with client feedback.

Fullstack Developer Intern
2023

Zeno

Built a mobile app from scratch using React and Spring Boot. Configured an OVH VM, set up a reverse proxy, and pointed our domain's DNS to the VM. Sole developer on the project, I gained strong autonomy and a deep understanding of clean React architecture and infrastructure.

Fullstack Developer / Engineer Intern
2025

Applyer ApS

Deployed a Next.js web app with Supabase to production. Chose the infrastructure and built a CD pipeline with Ansible and GitHub Actions. Automated infrastructure provisioning with Terraform. Collaborated with the team using GitHub.

PERSONAL PROJECTS

Twitch Bot & Link-in-Bio Page
2025 — current

Personal project

Built a Twitch bot in JavaScript and a Linktree-style landing page, integrating external APIs. Managed a client's requirements end-to-end, focusing on delivering a polished, high-quality result.

Roll-a-Die — Score Jam 2025 (21st place)
2025

Game jam project

Small Binding of Isaac-style game built in three days with a team of four (developer, graphic designer, sound designer). Ranked 21st in Score Jam 2025.
